

Toggle display of Hidden / System files

Opus FAQs

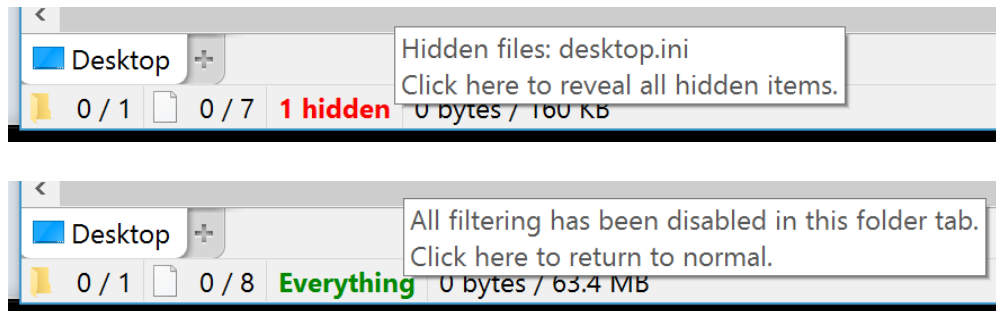

Leo #1 February 26, 2018, 11:48pm

Directory Opus 12 and above:

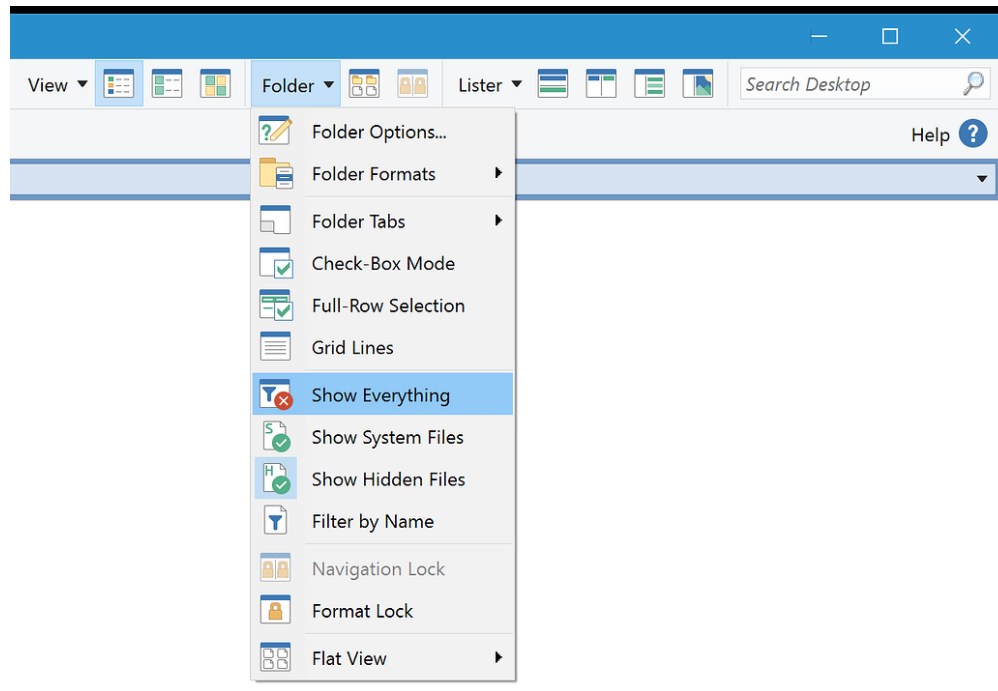

The **Show Everything** feature was added to give you a very quick way to show everything* in the current folder tab, no matter how it was filtered out and without changing any global Preferences.

(*Except folders when in *Flat View (No Folders)* mode, of course.)

You can toggle *Show Everything* by simply clicking the hidden items count on the default status bar:

An option to toggle *Show Everything* can also be found in the default **Folder** menu:

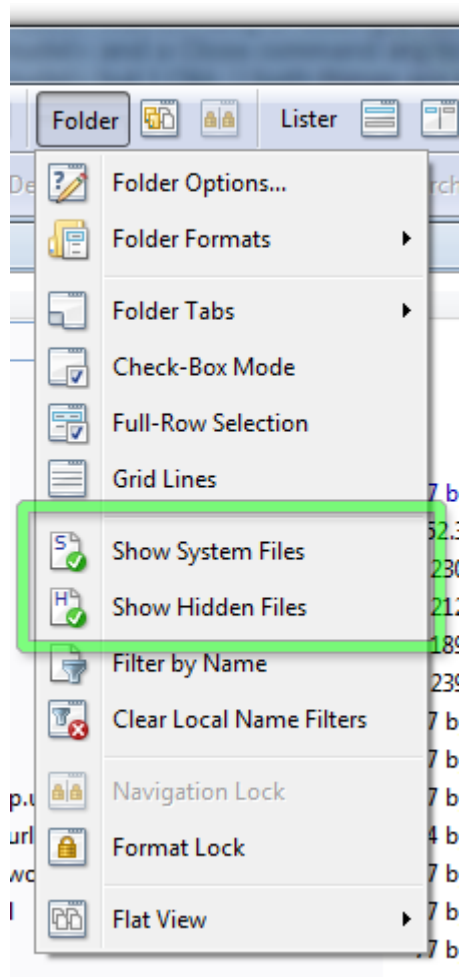

The rest of the guide may also be useful to you if you are using Opus 12.

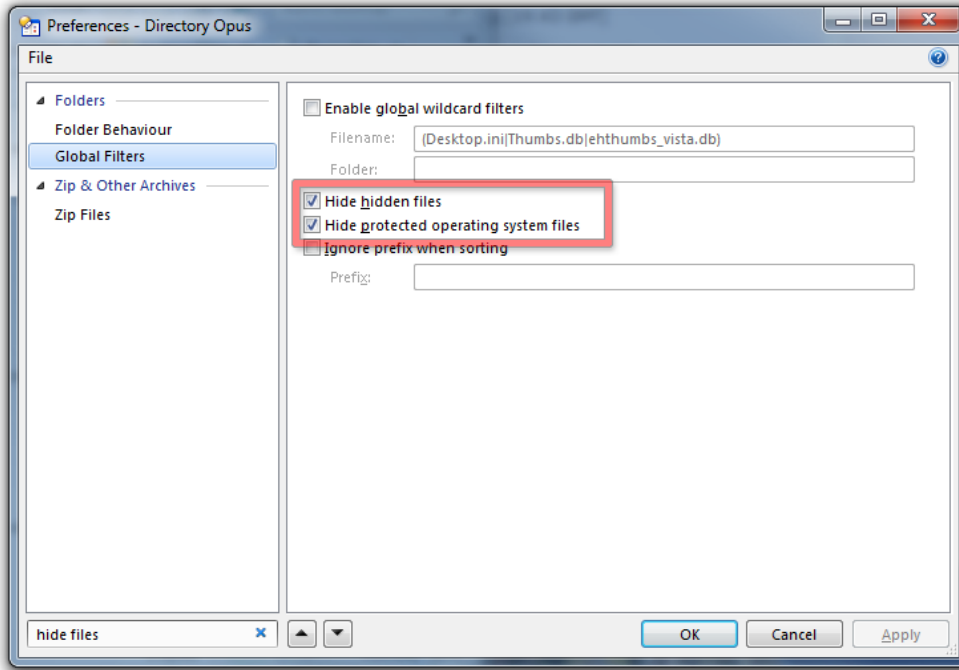

Directory Opus 10 and above:

(This also applies to Opus 12 and above, in case the newer *Show Everything* feature doesn't do what you want.)

Commands to toggle system and hidden items can be found in the default **Folder** menu:

Or under **Preferences / Folders / Global Filters:**

(These options affect all windows and folders at once. You can also use folder formats to hide files with certain attributes in certain folders.)
